

## Mopar Offers Exterior and Performance Enhancements for 2026 Dodge Charger models

The Moparized Dodge SIXPACK Charger concept showcases several exterior and performance accessories for the all-new modern-day muscle car. Check out the items below for what's available now or coming soon from Mopar for the 2026 Dodge Charger, shown with Mopar part number and U.S. manufacturer's suggested retail price.

### Available now on the [Mopar e-Store](#) or from a local dealer:

- **“Strobe-stripe” bodyside graphic:** inspired by the iconic styling of classic Mopar muscle cars. Available in the following:

| COLOR       | CHARGER MODEL | PART NUMBER | MSRP  |
|-------------|---------------|-------------|-------|
| Matte Black | 2-door        | 82219198AB  | \$495 |
| Matte Black | 4-door        | 82219206AB  | \$495 |
| Gloss Red   | 2-door        | 82219202AB  | \$495 |
| Gloss Red   | 4-door        | 82219496AA  | \$495 |

- **Bright pedal covers (82219148AB | \$150):** adds a performance look for the driver with a set of three stainless steel covers (includes brake, accelerator and dead pedal) with black rubber pads that provide plenty of foot traction
- **All-weather floor mats (82219053AA | \$170):** feature high-wall, bucket-style construction with factory-designed and exact-measured fit to provide maximum coverage and protect floor areas from wetness, snow, mud, dirt and grime
- **Rear cargo mat (82219055AA | \$125):** provides layer of floor protection with factory-designed and exact-measured fit

#### Expected availability before end of 2025:

- **Performance cat-back exhaust kit (77073018AA | \$3,950):** is developed specifically for the Hurricane 3.0-Liter Twin Turbo HO I6 engine; the stainless-steel system provides enhanced low-restriction air flow and a bold exhaust note

#### Expected availability first quarter 2026:

- **Lightweight carbon fiber front splitter (82219468AA – gloss finish or 82219522AA – satin finish | \$2,450):** provides enhanced front airflow for improved downforce and real-world performance gains
- **Lightweight carbon fiber rear decklid spoiler (82219521AA – satin finish or 82219464AA – gloss finish | \$2,450):** provides enhanced rear airflow for improved downforce and real-world performance gains
- **Cold air intake for Hurricane engines (77073044AA | \$895):** is available for both standard and high-output versions of the 3.0 Liter Twin Turbo I6 engine and provides enhanced airflow and more responsive power

#### Expected availability Spring 2026:

- **Suspension spring kit (77073045AA | \$325):** is developed specifically for the Charger SIXPACK model to lower ride height by 1-inch, reducing the center of gravity for enhanced road feel, sharper cornering and improved high-speed stability
- **Lightweight carbon fiber sport hood (check back for part number | \$6,995):** is 20-percent lighter than stock hood and features a hand-laid carbon fiber in unique split-V pattern and a functional scoop
